Main Criteria: Virtual Field Trips

Secondary Criteria: National Council for the Social Studies (NCSS), National Geography Standards (NGS), Next Generation Science Standards (NGSS)

Subjects: Science, Social Studies

Grade: 3

Virtual Field Trips

Grade 4 - West Region Geography

National Council for the Social Studies (NCSS) Social Studies

Grade 3 - Adopted: 2010

		Grade 3 - Adopted: 2010
THEME	NCSS.2.	TIME, CONTINUITY, AND CHANGE
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF THE PAST AND ITS LEGACY.
CATEGORY	2.1.	KNOWLEDGE - Learners will understand:
LEARNING EXPECTATION	2.1.6.	That people view and interpret historical events differently because of the times in which they live, the experiences they have, and the point of view they hold.
ТНЕМЕ	NCSS.2.	TIME, CONTINUITY, AND CHANGE
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF THE PAST AND ITS LEGACY.
CATEGORY	2.2.	PROCESSES - Learners will be able to:
LEARNING EXPECTATION	2.2.5.	Compare and contrast differing stories or accounts about past events, people, places, or situations, and offer possible reasons for the differences.
ТНЕМЕ	NCSS.3.	PEOPLE, PLACES, AND ENVIRONMENTS
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF PEOPLE, PLACES, AND ENVIRONMENTS.
CATEGORY	3.1.	KNOWLEDGE - Learners will understand:
LEARNING EXPECTATION	3.1.1.	The theme of people, places, and environments involves the study of location, place, and the interactions of people with their surroundings.
	3.1.1.	
EXPECTATION LEARNING		with their surroundings. Physical changes in community, state, and region, such as seasons, climate, and weather, and their effects on plants
EXPECTATION LEARNING EXPECTATION LEARNING	3.1.5.	with their surroundings. Physical changes in community, state, and region, such as seasons, climate, and weather, and their effects on plants and animals.
EXPECTATION LEARNING EXPECTATION LEARNING EXPECTATION	3.1.5. 3.1.7.	with their surroundings. Physical changes in community, state, and region, such as seasons, climate, and weather, and their effects on plants and animals. Benefits and problems resulting from the discovery and use of resources.
EXPECTATION LEARNING EXPECTATION LEARNING EXPECTATION	3.1.5. 3.1.7.	with their surroundings. Physical changes in community, state, and region, such as seasons, climate, and weather, and their effects on plants and animals. Benefits and problems resulting from the discovery and use of resources. PEOPLE, PLACES, AND ENVIRONMENTS SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF
EXPECTATION LEARNING EXPECTATION LEARNING EXPECTATION THEME DEFINITION	3.1.5. 3.1.7. NCSS.3.	with their surroundings. Physical changes in community, state, and region, such as seasons, climate, and weather, and their effects on plants and animals. Benefits and problems resulting from the discovery and use of resources. PEOPLE, PLACES, AND ENVIRONMENTS SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF PEOPLE, PLACES, AND ENVIRONMENTS.

DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF PEOPLE, PLACES, AND ENVIRONMENTS.
CATEGORY	3.3.	PRODUCTS - Learners demonstrate understanding by:

LEARNING EXPECTATION

3.3.1. Creating illustrations and composing answers to geographic questions about people, places, and environments.

National Geography Standards (NGS) Science

		Grade 3 - Adopted: 2012
ESSENTIAL ELEMENT	NGS.WST	The World in Spatial Terms
STANDARD	WST.3.	How to analyze the spatial organization of people, places, and environments on Earth's surface
STRAND	WST.3.3	Spatial Models: Models are used to represent features of human and/or physical systems
BENCHMARK	WST.3.3 .A.	Describe and construct models illustrating the properties of human and/or physical systems, as exemplified by being able to
EXPECTATION	WST.3.3. A.1.	Construct a model of Earth and describe its shape, size, and key features (e.g., equator, poles, prime meridian, oceans, continents).
ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.4.	The physical and human characteristics of places
STRAND	PR.4.2.	The Characteristics of Places: Places have physical and human characteristics
BENCHMARK	PR.4.2.A	Describe and compare the physical characteristics of places at a variety of scales, local to global, as exemplified by being able to
EXPECTATION	PR.4.2.A. 2.	Describe and compare the vegetation in different places in the world (e.g., deserts, mountains, rain forests, plains).
EXPECTATION	PR.4.2.A. 3.	Describe and compare the physical environments and landforms of different places in the world (e.g., mountains, islands, valleys or canyons, mesas).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.1.	Components of Earth's Physical Systems: There are four components of Earth's physical systems (the atmosphere, biosphere, hydrosphere, and lithosphere)
BENCHMARK	PS.7.1.A	Identify attributes of Earth's different physical systems, as exemplified by being able to
EXPECTATION	PS.7.1.A. 3.	Identify examples of landforms on Earth's surface (e.g., mountains, volcanoes, valleys, plains).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.3.	Physical Processes: Physical processes shape features on Earth's surface

BENCHMARK PS.7.3.B Describe how physical processes shape features on Earth's surface, as exemplified by being able to

EXPECTATION	PS.7.3.B. 2.	Describe the physical processes that shaped particular landform fealltures using pictures of landforms such as canyons, mesas, and deltas.
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.1.	Components of Ecosystems: The components of ecosystems
BENCHMARK	PS.8.1.A	Identify the components of different ecosystems, as exemplified by being able to
EXPECTATION	PS.8.1.A. 2.	Identify examples of each ecosystem component (e.g., pine trees versus grasslands, low versus high rainfall, clay versus sandy soils).
EXPECTATION	PS.8.1.A. 3.	Describe local ecosystems by surveying and recording the properties of their components.
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.2.	Characteristics and Geographic Distribution of Ecosystems: The characteristics of ecosystems
BENCHMARK	PS.8.2.A	Identify and describe the characteristics of ecosystems, as exemplified by being able to
EXPECTATION	PS.8.2.A. 1.	Identify and describe the characteristics of an ecosystem (specific types of plants, climate, and soil) in which a favorite or interesting creature lives.
EXPECTATION	PS.8.2.A. 2.	Identify and draw pictures of different plants and animals in various local ecosystems (e.g., a pond, forest, city park).
EXPECTATION	PS.8.2.A. 3.	Compare the characteristics of different ecosystems (e.g., pond, deliciduous forest, coral reef).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.3.	Characteristics and Geographic Distribution of Biomes: The characteristics of biomes
BENCHMARK	PS.8.3.A	Describe the characteristics of biomes, as exemplified by being able to
EXPECTATION	PS.8.3.A. 1.	Describe the defining characteristics of a biome as a large region of ecosystems with similar climate and vegetation characteristics.
EXPECTATION	PS.8.3.A. 2.	Describe the temperature, precipitation, and vegetation characteristics of various biomes, (e.g., deserts, grasslands, savannahs, temperate forests, tropical forests, arctic tundra).
EXPECTATION	PS.8.3.A. 3.	Identify the characteristics in photographs of different types of vegletation and match them to the appropriate sections of a world clillmate map (e.g., cacti and succulents on a desert climate region, tropilical forest trees on a tropical climate region, coral in shallow, tropical marine waters).
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society

STANDARD	ES.15.	How physical systems affect human systems
STRAND	ES.15.2.	Environmental Hazards: Environmental hazards affect human activities
BENCHMARK	ES.15.2. A.	Identify and describe the locations of environmental hazards, as exemplified by being able to
EXPECTATION	ES.15.2.A .2.	Identify on a map of the Pacific basin the occurrences of earthquakes and volcanoes and describe the pattern that results (e.g., the Pacific Ring of Fire).
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
STANDARD	ES.16.	The changes that occur in the meaning, use, distribution, and importance of resources
STRAND	ES.16.1.	Types and Meanings of Resources: The characteristics of renewable, nonrenewable, and flow resources
BENCHMARK	ES.16.1. A.	Identify and explain the characteristics of renewable, nonrenewable, and flow resources, as exemplified by being able to
EXPECTATION	ES.16.1.A	Explain the meaning of the term "resource" and then illustrate the idea of renewable, nonrenewable, and flow resources by sorting example photographs into each of the three categories.

National Geography Standards (NGS) Social Studies

		Grade 3 - Adopted: 2012
ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.4.	The physical and human characteristics of places
STRAND	PR.4.1.	The Concept of Place: Places are locations having distinctive characteristics that give them meaning and distinguish them from other locations
BENCHMARK	PR.4.1.A	Describe the distinguishing characteristics and meanings of several different places, as exemplified by being able to
EXPECTATION	PR.4.1.A. 1.	Identify and describe categories of characteristics that define a localition as a place (e.g., weather characteristics, population density, artichitectural styles, landforms, vegetation, cultures, types of industry).
ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.4.	The physical and human characteristics of places
STRAND	PR.4.2.	The Characteristics of Places: Places have physical and human characteristics
BENCHMARK	PR.4.2.A	Describe and compare the physical characteristics of places at a variety of scales, local to global, as exemplified by being able to
EXPECTATION	PR.4.2.A. 1.	Describe and compare the climatic conditions at different places in the United States (e.g., deserts, mountains, rainy regions of the Pacific Northwest).
ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.5.	That people create regions to interpret Earth's complexity
STANDARD		
STRAND	PR.5.1.	The Concept of Region: Regions are areas of Earth's surface with unifying physical and/or human characteristics

EXPECTATION	PR.5.1.A. 1.	Identify unifying areas on a map that define those areas as regions (e.g., a zoo map showing how animal exhibits are organized by religions related to climate, landforms, and vegetation zones).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.1.	Components of Earth's Physical Systems: There are four components of Earth's physical systems (the atmosphere, biosphere, hydrosphere, and lithosphere)
BENCHMARK	PS.7.1.A	Identify attributes of Earth's different physical systems, as exemplified by being able to
EXPECTATION	PS.7.1.A. 3.	ldentify examples of landforms on Earth's surface (e.g., mountains, volcanoes, valleys, plains).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.2.	Earth-Sun Relationships: Earth-Sun relationships affect conditions on Earth
BENCHMARK	PS.7.2.A	Describe how Earth's position relative to the Sun affects conditions on Earth, as exemplified by being able to
EXPECTATION	PS.7.2.A. 1.	Describe the relationship between the cycle of seasons and months in the Northern and Southern hemispheres.
EXPECTATION	PS.7.2.A. 2.	Describe the differences in seasons based on latitude (e.g., first and last frost in different locations, length of growing season, bird migralitions).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.1.	Components of Ecosystems: The components of ecosystems
BENCHMARK	PS.8.1.A	Identify the components of different ecosystems, as exemplified by being able to
EXPECTATION	PS.8.1.A. 1.	Identify the three major components of an ecosystem (i.e., biomass, climate, and soil).
EXPECTATION	PS.8.1.A. 2.	Identify examples of each ecosystem component (e.g., pine trees versus grasslands, low versus high rainfall, clay versus sandy soils).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.2.	Characteristics and Geographic Distribution of Ecosystems: The characteristics of ecosystems
BENCHMARK	PS.8.2.A	Identify and describe the characteristics of ecosystems, as exemplified by being able to
	•	

EXPECTATION	PS.8.2.A. 3.	Compare the characteristics of different ecosystems (e.g., pond, deliciduous forest, coral reef).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.3.	Characteristics and Geographic Distribution of Biomes: The characteristics of biomes
BENCHMARK	PS.8.3.A	Describe the characteristics of biomes, as exemplified by being able to
EXPECTATION	PS.8.3.A. 1.	Describe the defining characteristics of a biome as a large region of ecosystems with similar climate and vegetation characteristics.
EXPECTATION	PS.8.3.A. 2.	Describe the temperature, precipitation, and vegetation characterislitics of various biomes, (e.g., deserts, grasslands, savannahs, temperate forests, tropical forests, arctic tundra).
EXPECTATION	PS.8.3.A. 3.	Identify the characteristics in photographs of different types of vegletation and match them to the appropriate sections of a world clilmate map (e.g., cacti and succulents on a desert climate region, tropiical forest trees on a tropical climate region, coral in shallow, tropical marine waters).
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.9.	The characteristics, distribution, and migration of human populations on Earth's surface
STRAND	HS.9.2.	Spatial Distribution of Population: People live in many different places on Earth
BENCHMARK	HS.9.2.A	Describe how the number of people varies from place to place, as exemplified by being able to
EXPECTATION	HS.9.2.A. 2.	Describe how ways of making a living influence how many people live in a certain place (e.g., farm communities versus cities).
EXPECTATION	HS.9.2.A. 3.	Identify and describe places in the state where the greatest and fewlest numbers of people live.
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.9.	The characteristics, distribution, and migration of human populations on Earth's surface
STRAND	HS.9.2.	Spatial Distribution of Population: People live in many different places on Earth
BENCHMARK	HS.9.2.B	Explain why people live in different types of places, as exemplified by being able to
EXPECTATION	HS.9.2.B. 3.	Explain why people sometimes settle in inhospitable environments (e.g., availability of valuable resources, economic opportunities, diliminishing availability of more desirable locations).
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.9.	The characteristics, distribution, and migration of human populations on Earth's surface
STRAND	HS.9.3.	Migration: People move for a variety of reasons
BENCHMARK	HS.9.3.A	Describe examples of different human migrations, as exemplified by being able to

EXPECTATION HS.12.3.A Analyze a map of US population density and describe where the major clusters of settlements are located. 3. ESSENTIAL ELEMENT NGS.ES. Environment and Society ST ANDARD ES.14. How human actions modify the physical environment ST RAND ES.14.2. The Use of Technology: People use technology to get what they need from the physical environment BENCHMARK ES.14.2. Describe and explain ways in which people use technology to get what they need from the physical environment, as exemplified by being able to EXPECTATION ES.14.2.A Describe and explain examples of the technology used in different industries in the United States (e.g., high-tech farming and irrigation, excavating machinery in strip mining, drilling in oil production). ESSENTIAL ELEMENT NGS.ES. Environment and Society ET.15. How physical systems affect human systems	EXPECTATION	HS.9.3.A. 1.	Describe why and how people moved west during the California Gold Rush.
STRAND HS.12.3. Paterns of Settlement: There are different types of settlements BENCHMARK HS.12.3. Compare and explain the different types of settlements in the local region and the United States, as exemplified by being able to EXPECTATION HS.12.3. Analyze a map of US population density and describe where the major clusters of settlements are located. 3. ESSENTIAL NGS.ES. Environment and Society STANDARD ES.14. How human actions modify the physical environment STRAND ES.14. The Use of Technology: People use technology to get what they need from the physical environment ESPECTATION ES.14. Describe and explain was in which people use technology to get what they need from the physical environment, as exemplified by being able to EXPECTATION ES.14. Describe and explain examples of the schoology used in different industries in the United States (e.g., high-tech faming and ingestion, excavating machinery in stip mining, drilling in oil production). ESSENTIAL Imming and ingestion, excavating machinery in stip mining, drilling in oil production). ESSENTIAL ELEMENT ES.15.1. Describe and explain examples of the schoology used in different industries in the United States (e.g., high-tech faming and ingestion, excavating machinery in stip mining, drilling in oil production). ESSENTIAL ELEMENT ES.15.1. Describe and constraints on human activities ENPECTATION ES.15. Describe examples in which the physical environment imposes constraints on human activities as oxemplified by being able to constraints on the man activities are limited by different types of climates (e.g., cold or polar, rainy or dry, equatorial). EXPECTATION ES.15.1. Describe examples in which human activities are limited by different types of climates (e.g., cold or polar, rainy or dry, equatorial). EXPECTATION ES.15.2. Environment and Society ELEMENT ENVIRONMENT AND Exemples are subjected to the locations of environmental hazards affect human activities ENVIRONMENT AND Ex.15.2. Environment and Society EXPECTATION ES.15.2. Identify and de		NGS.HS.	Human Systems
BENCHMARK A. Compare and explain the different types of settlements in the local region and the United States, as exemplified by being able to EXPECTATION BS.12.3. STRAND	ES.15.2.	Environmental Hazards: Environmental hazards affect human activities
BENCHMARK	ES.15.2. B.	Describe and analyze the effects of environmental hazards on human activities, as exemplified by being able to
EXPECTATION	ES.15.2.B .1.	Describe how people change their behaviors in response to environmental hazards (e.g., knowing evacuation routes, building a storm shelter, conducting earthquake or tornado drills).
EXPECTATION	ES.15.2.B .2.	Describe how people might build their houses differently on a coast or beach as compared to another location (e.g., elevated footings for storm surge, shutters over windows, metal reinforced roof trusses for wind).
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
STANDARD	ES.16.	The changes that occur in the meaning, use, distribution, and importance of resources
STRAND	ES.16.2.	Location and Distribution of Resources: The spatial distribution of types of resources
BENCHMARK	ES.16.2. A.	Identify the locations of examples of each type of resource, as exemplified by being able to
EXPECTATION	ES.16.2.A .1.	Identify the locations on a US map of various types of renewable, nonrenewable, and flow resources.
EXPECTATION	ES.16.2.A	Identify the locations of examples of each of the three types of resources that are found in the student's state or region.

Next Generation Science Standards (NGSS) Science

Grade 3 - Adopted: 2013

STRAND	NGSS.3- LS	LIFE SCIENCE
TITLE	3-LS1	From Molecules to Organisms: Structures and Processes
		Students who demonstrate understanding can:
PERFORMANCE EXPECTATION	3-LS1-1	Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death.
STRAND	NGSS.3- LS	LIFE SCIENCE
TITLE	3-LS4	Biological Evolution: Unity and Diversity
		Students who demonstrate understanding can:
PERFORMANCE EXPECTATION	3-LS4-2	Use evidence to construct an explanation for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing.
PERFORMANCE EXPECTATION	3-LS4-3	Construct an argument with evidence that in a particular habitat some organisms can survive well, some survive less well, and some cannot survive at all.
STRAND	NGSS.3- ESS	EARTH AND SPACE SCIENCE
TITLE	3-ESS2	Earth's Systems
		Students who demonstrate understanding can:

PERFORMANCE EXPECTATION	3-ESS2-1	Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season.
PERFORMANCE EXPECTATION	3-ESS2-2	Obtain and combine information to describe climates in different regions of the world.

Main Criteria: Virtual Field Trips

Secondary Criteria: National Council for the Social Studies (NCSS), National Geography Standards (NGS), Next Generation Science Standards (NGSS)

Subjects: Science, Social Studies

Grade: 4

Virtual Field Trips

Grade 4 - West Region Geography

National Council for the Social Studies (NCSS) Social Studies

Grade 4 - Adopted: 2010

	Grade 4 - Adopted: 2010			
ТНЕМЕ	NCSS.2.	TIME, CONTINUITY, AND CHANGE		
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF THE PAST AND ITS LEGACY.		
CATEGORY	2.1.	KNOWLEDGE - Learners will understand:		
LEARNING EXPECTATION	2.1.6.	That people view and interpret historical events differently because of the times in which they live, the experiences they have, and the point of view they hold.		
ТНЕМЕ	NCSS.2.	TIME, CONTINUITY, AND CHANGE		
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF THE PAST AND ITS LEGACY.		
CATEGORY	2.2.	PROCESSES - Learners will be able to:		
LEARNING EXPECTATION	2.2.5.	Compare and contrast differing stories or accounts about past events, people, places, or situations, and offer possible reasons for the differences.		
ТНЕМЕ	NCSS.3.	PEOPLE, PLACES, AND ENVIRONMENTS		
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF PEOPLE, PLACES, AND ENVIRONMENTS.		
CATEGORY	3.1.	KNOWLEDGE - Learners will understand:		
LEARNING	2.1.1	The thoma of morale places and environments involves the study of leasting place, and the interactions of morals		
EXPECTATION	3.1.1.	The theme of people, places, and environments involves the study of location, place, and the interactions of people with their surroundings.		
	3.1.5.			
EXPECTATION LEARNING		with their surroundings. Physical changes in community, state, and region, such as seasons, climate, and weather, and their effects on plants		
EXPECTATION LEARNING EXPECTATION LEARNING	3.1.5.	with their surroundings. Physical changes in community, state, and region, such as seasons, climate, and weather, and their effects on plants and animals.

Benefits and problems resulting from the discovery and use of resources. PEOPLE, PLACES, AND ENVIRONMENTS SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF PEOPLE, PLACES, AND ENVIRONMENTS.		

DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF PEOPLE, PLACES, AND ENVIRONMENTS.
CATEGORY	3.3.	PRODUCTS - Learners demonstrate understanding by:
LEARNING	3.3.1.	Creating illustrations and composing answers to geographic questions about people, places, and environments.

LEARNING **EXPECTATION**

BENCHMARK

National Geography Standards (NGS) Science

		Grade 4 - Adopted: 2012
ESSENTIAL ELEMENT	NGS.WST	The World in Spatial Terms
STANDARD	WST.3.	How to analyze the spatial organization of people, places, and environments on Earth's surface
STRAND	WST.3.3	Spatial Models: Models are used to represent features of human and/or physical systems
BENCHMARK	WST.3.3 .A.	Describe and construct models illustrating the properties of human and/or physical systems, as exemplified by being able to
EXPECTATION	WST.3.3. A.1.	Construct a model of Earth and describe its shape, size, and key features (e.g., equator, poles, prime meridian, oceans, continents).
ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.4.	The physical and human characteristics of places
STRAND	PR.4.2.	The Characteristics of Places: Places have physical and human characteristics
BENCHMARK	PR.4.2.A	Describe and compare the physical characteristics of places at a variety of scales, local to global, as exemplified by being able to
EXPECTATION	PR.4.2.A. 2.	Describe and compare the vegetation in different places in the world (e.g., deserts, mountains, rain forests, plains).
EXPECTATION	PR.4.2.A. 3.	Describe and compare the physical environments and landforms of different places in the world (e.g., mountains, islands, valleys or canyons, mesas).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.1.	Components of Earth's Physical Systems: There are four components of Earth's physical systems (the atmosphere, biosphere, hydrosphere, and lithosphere)
BENCHMARK	PS.7.1.A	Identify attributes of Earth's different physical systems, as exemplified by being able to
EXPECTATION	PS.7.1.A. 3.	Identify examples of landforms on Earth's surface (e.g., mountains, volcanoes, valleys, plains).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.3.	Physical Processes: Physical processes shape features on Earth's surface
DENIGUIMARK	50705	

PS.7.3.B Describe how physical processes shape features on Earth's surface, as exemplified by being able to

EXPECTATION	PS.7.3.B. 2.	Describe the physical processes that shaped particular landform fealltures using pictures of landforms such as canyons, mesas, and deltas.
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.1.	Components of Ecosystems: The components of ecosystems
BENCHMARK	PS.8.1.A	Identify the components of different ecosystems, as exemplified by being able to
EXPECTATION	PS.8.1.A. 2.	Identify examples of each ecosystem component (e.g., pine trees versus grasslands, low versus high rainfall, clay versus sandy soils).
EXPECTATION	PS.8.1.A. 3.	Describe local ecosystems by surveying and recording the properlities of their components.
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.2.	Characteristics and Geographic Distribution of Ecosystems: The characteristics of ecosystems
BENCHMARK	PS.8.2.A	Identify and describe the characteristics of ecosystems, as exemplified by being able to
EXPECTATION	PS.8.2.A. 1.	Identify and describe the characteristics of an ecosystem (specific types of plants, climate, and soil) in which a favorite or interesting creature lives.
EXPECTATION	PS.8.2.A. 2.	Identify and draw pictures of different plants and animals in various local ecosystems (e.g., a pond, forest, city park).
EXPECTATION	PS.8.2.A. 3.	Compare the characteristics of different ecosystems (e.g., pond, deliciduous forest, coral reef).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.3.	Characteristics and Geographic Distribution of Biomes: The characteristics of biomes
BENCHMARK	PS.8.3.A	Describe the characteristics of biomes, as exemplified by being able to
EXPECTATION	PS.8.3.A. 1.	Describe the defining characteristics of a biome as a large region of ecosystems with similar climate and vegetation characteristics.
EXPECTATION	PS.8.3.A. 2.	Describe the temperature, precipitation, and vegetation characterislitics of various biomes, (e.g., deserts, grasslands, savannahs, temperate forests, tropical forests, arctic tundra).
EXPECTATION	PS.8.3.A. 3.	Identify the characteristics in photographs of different types of vegletation and match them to the appropriate sections of a world clilmate map (e.g., cacti and succulents on a desert climate region, tropilical forest trees on a tropical climate region, coral in shallow, tropical marine waters).
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
		12

STANDARD	ES.15.	How physical systems affect human systems
STRAND	ES.15.2.	Environmental Hazards: Environmental hazards affect human activities
BENCHMARK	ES.15.2. A.	Identify and describe the locations of environmental hazards, as exemplified by being able to
EXPECTATION	ES.15.2.A .2.	Identify on a map of the Pacific basin the occurrences of earthquakes and volcanoes and describe the pattern that results (e.g., the Pacific Ring of Fire).
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
STANDARD	ES.16.	The changes that occur in the meaning, use, distribution, and importance of resources
STRAND	ES.16.1.	Types and Meanings of Resources: The characteristics of renewable, nonrenewable, and flow resources
BENCHMARK	ES.16.1. A.	Identify and explain the characteristics of renewable, nonrenewable, and flow resources, as exemplified by being able to
EXPECTATION	ES.16.1.A	Explain the meaning of the term "resource" and then illustrate the idea of renewable, nonrenewable, and flow resources by sorting example photographs into each of the three categories.

National Geography Standards (NGS) Social Studies

Grade 4 - Adopted: 2012		
ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.4.	The physical and human characteristics of places
STRAND	PR.4.1.	The Concept of Place: Places are locations having distinctive characteristics that give them meaning and distinguish them from other locations
BENCHMARK	PR.4.1.A	Describe the distinguishing characteristics and meanings of several different places, as exemplified by being able to
EXPECTATION	PR.4.1.A. 1.	Identify and describe categories of characteristics that define a localition as a place (e.g., weather characteristics, population density, arlichitectural styles, landforms, vegetation, cultures, types of industry).
ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.4.	The physical and human characteristics of places
STRAND	PR.4.2.	The Characteristics of Places: Places have physical and human characteristics
BENCHMARK	PR.4.2.A	Describe and compare the physical characteristics of places at a variety of scales, local to global, as exemplified by being able to
EXPECTATION	PR.4.2.A. 1.	Describe and compare the climatic conditions at different places in the United States (e.g., deserts, mountains, rainy regions of the Pacific Northwest).
ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.5.	That people create regions to interpret Earth's complexity
STRAND	PR.5.1.	The Concept of Region: Regions are areas of Earth's surface with unifying physical and/or human characteristics
BENCHMARK	PR.5.1.A	Describe the distinguishing characteristics and meanings of several different regions, as exemplified by being able to

EXPECTATION	PR.5.1.A. 1.	Identify unifying areas on a map that define those areas as regions (e.g., a zoo map showing how animal exhibits are organized by religions related to climate, landforms, and vegetation zones).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.1.	Components of Earth's Physical Systems: There are four components of Earth's physical systems (the atmosphere, biosphere, hydrosphere, and lithosphere)
BENCHMARK	PS.7.1.A	Identify attributes of Earth's different physical systems, as exemplified by being able to
EXPECTATION	PS.7.1.A. 3.	Identify examples of landforms on Earth's surface (e.g., mountains, volcanoes, valleys, plains).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.2.	Earth-Sun Relationships: Earth-Sun relationships affect conditions on Earth
BENCHMARK	PS.7.2.A	Describe how Earth's position relative to the Sun affects conditions on Earth, as exemplified by being able to
EXPECTATION	PS.7.2.A. 1.	Describe the relationship between the cycle of seasons and months in the Northern and Southern hemispheres.
EXPECTATION	PS.7.2.A. 2.	Describe the differences in seasons based on latitude (e.g., first and last frost in different locations, length of growing season, bird migraltions).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.1.	Components of Ecosystems: The components of ecosystems
BENCHMARK	PS.8.1.A	Identify the components of different ecosystems, as exemplified by being able to
EXPECTATION	PS.8.1.A. 1.	Identify the three major components of an ecosystem (i.e., biomass, climate, and soil).
EXPECTATION	PS.8.1.A. 2.	Identify examples of each ecosystem component (e.g., pine trees versus grasslands, low versus high rainfall, clay versus sandy soils).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.2.	Characteristics and Geographic Distribution of Ecosystems: The characteristics of ecosystems
BENCHMARK	PS.8.2.A	Identify and describe the characteristics of ecosystems, as exemplified by being able to
EXPECTATION	PS.8.2.A. 1.	Identify and describe the characteristics of an ecosystem (specific types of plants, climate, and soil) in which a favorite or interesting creature lives.

EXPECTATION	PS.8.2.A. 3.	Compare the characteristics of different ecosystems (e.g., pond, deliciduous forest, coral reef).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.3.	Characteristics and Geographic Distribution of Biomes: The characteristics of biomes
BENCHMARK	PS.8.3.A	Describe the characteristics of biomes, as exemplified by being able to
EXPECTATION	PS.8.3.A. 1.	Describe the defining characteristics of a biome as a large region of ecosystems with similar climate and vegetation characteristics.
EXPECTATION	PS.8.3.A. 2.	Describe the temperature, precipitation, and vegetation characteristics of various biomes, (e.g., deserts, grasslands, savannahs, temperate forests, tropical forests, arctic tundra).
EXPECTATION	PS.8.3.A. 3.	Identify the characteristics in photographs of different types of vegletation and match them to the appropriate sections of a world clilmate map (e.g., cacti and succulents on a desert climate region, tropilical forest trees on a tropical climate region, coral in shallow, tropical marine waters).
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.9.	The characteristics, distribution, and migration of human populations on Earth's surface
STRAND	HS.9.2.	Spatial Distribution of Population: People live in many different places on Earth
BENCHMARK	HS.9.2.A	Describe how the number of people varies from place to place, as exemplified by being able to
EXPECTATION	HS.9.2.A. 2.	Describe how ways of making a living influence how many people live in a certain place (e.g., farm communities versus cities).
EXPECTATION	HS.9.2.A. 3.	Identify and describe places in the state where the greatest and fewlest numbers of people live.
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.9.	The characteristics, distribution, and migration of human populations on Earth's surface
STRAND	HS.9.2.	Spatial Distribution of Population: People live in many different places on Earth
BENCHMARK	HS.9.2.B	Explain why people live in different types of places, as exemplified by being able to
EXPECTATION	HS.9.2.B. 3.	Explain why people sometimes settle in inhospitable environments (e.g., availability of valuable resources, economic opportunities, diliminishing availability of more desirable locations).
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.9.	The characteristics, distribution, and migration of human populations on Earth's surface
STRAND	HS.9.3.	Migration: People move for a variety of reasons
BENCHMARK	HS.9.3.A	Describe examples of different human migrations, as exemplified by being able to

EXPECTATION	HS.9.3.A. 1.	Describe why and how people moved west during the California Gold Rush.
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.12.	The processes, patterns, and functions of human settlement
STRAND	HS.12.3.	Patterns of Settlement: There are different types of settlements
BENCHMARK	HS.12.3. A.	Compare and explain the different types of settlements in the local region and the United States, as exemplified by being able to
EXPECTATION	HS.12.3.A .3.	Analyze a map of US population density and describe where the major clusters of settlements are located.
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
STANDARD	ES.14.	How human actions modify the physical environment
STRAND	ES.14.2.	The Use of Technology: People use technology to get what they need from the physical environment
BENCHMARK	ES.14.2. A.	Describe and explain ways in which people use technology to get what they need from the physical environment, as exemplified by being able to
EXPECTATION	ES.14.2.A .1.	Describe and explain examples of the technology used in different industries in the United States (e.g., high-tech farming and irrigation, excavating machinery in strip mining, drilling in oil production).
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
STANDARD	ES.15.	How physical systems affect human systems
STANDARD STRAND	ES.15.	How physical systems affect human systems Environmental Opportunities and Constraints: The physical environment provides opportunities for and imposes constraints on human activities

Environmental Opportunities and Constraints: The physical environment provides opportunities for and imposes constraints on human activities Describe examples in which the physical environment imposes constraints on human activities, as exemplified by being able to Describe how human activities are limited by landforms such as flood plains, deltas, mountains, and slopes in choices of land use (e.g., agriculture, human settlement, transportation networks). Describe examples in which human activities are limited by different types of climates (e.g., cold or polar, rainy or dry, equatorial). Environment and Society How physical systems affect human systems Environmental Hazards: Environmental hazards affect human activities Identify and describe the locations of environmental hazards, as exemplified by being able to

STRAND	ES.15.2.	Environmental Hazards: Environmental hazards affect human activities
BENCHMARK	ES.15.2. B.	Describe and analyze the effects of environmental hazards on human activities, as exemplified by being able to
EXPECTATION	ES.15.2.B .1.	Describe how people change their behaviors in response to environmental hazards (e.g., knowing evacuation routes, building a storm shelter, conducting earthquake or tornado drills).
EXPECTATION	ES.15.2.B .2.	Describe how people might build their houses differently on a coast or beach as compared to another location (e.g., elevated footings for storm surge, shutters over windows, metal reinforced roof trusses for wind).
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
STANDARD	ES.16.	The changes that occur in the meaning, use, distribution, and importance of resources
STRAND	ES.16.2.	Location and Distribution of Resources: The spatial distribution of types of resources
BENCHMARK	ES.16.2. A.	Identify the locations of examples of each type of resource, as exemplified by being able to
EXPECTATION	ES.16.2.A .1.	Identify the locations on a US map of various types of renewable, nonrenewable, and flow resources.
EXPECTATION	ES.16.2.A	Identify the locations of examples of each of the three types of resources that are found in the student's state or region.

Next Generation Science Standards (NGSS) Science

Grade 4 - Adopted: 2013

STRAND	NGSS.4- LS	LIFE SCIENCE
TITLE	4-LS1	From Molecules to Organisms: Structures and Processes
		Students who demonstrate understanding can:
PERFORMANCE EXPECTATION	4-LS1-1	Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction.
PERFORMANCE EXPECTATION	4-LS1-2	Use a model to describe that animals receive different types of information through their senses, process the information in their brain, and respond to the information in different ways.
STRAND	NGSS.4- ESS	EARTH AND SPACE SCIENCE
TITLE	4-ESS3	Earth and Human Activity
		Students who demonstrate understanding can:
		Students who demonstrate understanding can:

PERFORMANCE 4-ESS3-1 Obtain and combine information to describe that energy and fuels are derived from natural resources and their uses EXPECTATION affect the environment.

Main Criteria: Virtual Field Trips

Secondary Criteria: National Council for the Social Studies (NCSS), National Geography Standards (NGS), Next Generation Science Standards (NGSS)

Subjects: Science, Social Studies

Grade: 5

Virtual Field Trips

Grade 4 - West Region Geography

National Council for the Social Studies (NCSS) Social Studies

Grade 5 - Adopted: 2010

		Grade 5 - Adopted: 2010
THEME	NCSS.1.	CULTURE
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF CULTURE AND CULTURAL DIVERSITY.
CATEGORY	1.2.	PROCESSES - Learners will be able to:
LEARNING EXPECTATION	1.2.3.	Evaluate how data and experiences may be interpreted differently by people from diverse cultural perspectives and frames of reference.
ТНЕМЕ	NCSS.2.	TIME, CONTINUITY, AND CHANGE
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF THE PAST AND ITS LEGACY.
CATEGORY	2.1.	KNOWLEDGE - Learners will understand:
LEARNING EXPECTATION	2.1.2.	Concepts such as: chronology, causality, change, conflict, complexity, multiple perspectives, primary and secondary sources, and cause and effect.
LEARNING EXPECTATION	2.1.4.	That historical interpretations of the same event may differ on the basis of such factors as conflicting evidence from varied sources, national or cultural perspectives, and the point of view of the researcher.
LEARNING EXPECTATION	2.1.6.	The origins and influences of social, cultural, political, and economic systems.
ТНЕМЕ	NCSS.2.	TIME, CONTINUITY, AND CHANGE
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF THE PAST AND ITS LEGACY.
CATEGORY	2.2.	PROCESSES - Learners will be able to:
LEARNING EXPECTATION	2.2.4.	Evaluate the impact of the values, beliefs, and institutions of people in the past on important historical decisions and developments of their times.
ТНЕМЕ	NCSS.3.	PEOPLE, PLACES, AND ENVIRONMENTS
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF PEOPLE, PLACES, AND ENVIRONMENTS.
CATEGORY	3.1.	KNOWLEDGE - Learners will understand:
LEARNING EXPECTATION	3.1.1.	The theme of people, places, and environments involves the study of the relationships between human populations in different locations and geographic phenomena such as climate, vegetation, and natural resources.
LEARNING EXPECTATION	3.1.2.	Concerts such as: location, region, place, and migration, as well as human and physical systems.

LEARNING EXPECTATION	3.1.3.	Past and present changes in physical systems, such as seasons, climate, and weather, and the water cycle, in both national and global contexts.
LEARNING EXPECTATION	3.1.5.	The concept of regions identifies links between people in different locations according to specific criteria (e.g., physical, economic, social, cultural, or religious).
ТНЕМЕ	NCSS.3.	PEOPLE, PLACES, AND ENVIRONMENTS
DEFINITION		SOCIAL STUDIES PROGRAMS SHOULD INCLUDE EXPERIENCES THAT PROVIDE FOR THE STUDY OF PEOPLE, PLACES, AND ENVIRONMENTS.
DEFINITION	3.2.	

National Geography Standards (NGS) Science

ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.4.	The physical and human characteristics of places
STRAND	PR.4.2.	The Characteristics of Place: Physical and human characteristics of places change
BENCHMARK	PR.4.2.A	Explain the ways that physical processes change places, as exemplified by being able to
EXPECTATION	PR.4.2.A. 2.	Explain the ways in which islands and coastal places may change as a result of sea level rise.
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.1.	Components of Earth's Physical Systems: The four components of Earth's physical systems (the atmosphere, biosphere, hydrosphere, and lithosphere) are interdependent
BENCHMARK	PS.7.1.A	Identify and describe patterns in the environment that result from the interaction of Earth's physical processes, as exemplified by being able to
EXPECTATION	PS.7.1.A. 1.	Identify and describe the connections between ocean circulation system and climate (e.g., North Atlantic Drift and the mild climate of Western Europe, the climatic effects of El Niño or La Niña).
EXPECTATION	PS.7.1.A. 2.	Identify and describe the patterns that result from the connections between climate and vegetation (e.g., examples of patterns of ecosys@tems and biomes).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.1.	Components of Earth's Physical Systems: The four components of Earth's physical systems (the atmosphere, biosphere, hydrosphere, and lithosphere) are interdependent
BENCHMARK	PS.7.1.B	Analyze and explain patterns of physical features resulting from the interactions of Earth's physical processes, as exemplified by being able to

EXPECTATION

1.

valleys).

PS.7.1.B. Analyze maps of tectonic plates to predict the location of physical features (e.g., mountain ranges, volcanoes, rift

ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.2.	Earth-Sun Relationships: Earth-Sun relationships drives physical processes that follow an annual cycle and create patterns on Earth
BENCHMARK	PS.7.2.A	Explain how Earth-Sun relationships drive Earth's physical processes and create annual patterns, as exemplified by being able to
EXPECTATION	PS.7.2.A. 1.	Explain the occurrences of weather phenomena in different localitions due to annual changes in the Earth-Sun relationship (e.g., hurliricanes in the fall in subtropical areas, monsoon rainfall, tornadoes in the mid-latitudes during the spring and summer).
EXPECTATION	PS.7.2.A. 2.	Explain why the hours of visible sunlight changes with seasons (e.g., the equatorial region experiences approximately 12 hours of sunlight year round while places in the Arctic and Antarctic circles vary from 0 to 24 hours of visible sunlight).
EXPECTATION	PS.7.2.A. 3.	Describe how the angle of the Sun's rays changes at different latitudes by shining a light directly on the equator of a globe and noting the change in the location (on the tropic lines) and angle of the direct rays as the tilted globe is moved to represent the different seasons.
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.3.	Physical Processes: Physical processes generate patterns of features across Earth's surface
BENCHMARK	PS.7.3.A	Analyze and explain the patterns that occur on Earth's surface as a result of physical processes, as exemplified by being able to
EXPECTATION	PS.7.3.A. 2.	Explain how physical processes related to plate tectonics form is lands (e.g., Hawaiian Islands) or increase the elevation of mountains (e.g., Himalayan Mountains).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.2.	Characteristics and Geographic Distribution of Ecosystems: Physical processes determine the characteristics of ecosystems
BENCHMARK	PS.8.2.A	Describe and explain how physical processes determine the characteristics of ecosystems, as exemplified by being able to
EXPECTATION	PS.8.2.A. 1.	Describe the rain shadow effect of orographic precipitation and identify the different ecosystems on the windward and leeward side of a mountain range or island (e.g., temperate rain forest on the windward side and high desert on the leeward side of the Cascade Mountain Range).
EXPECTATION	PS.8.2.A. 2.	Explain how different locations can have similar ecosystems as a function of temperature, precipitation, elevation, and latitude by usling climographs and vegetation maps.
EXPECTATION	PS.8.2.A. 3.	Explain how ocean currents influence the characteristics of ecosys tems (e.g., the Peru current and the Atacama Desert, the Benguela current and Namib Desert, East Indian current in the Bay of Bengal and monsoon season in India).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface 20

STRAND	PS.8.3.	Characteristics and Geographic Distribution of Biomes: Climate primarily determines the characteristics and geographic distribution of biomes
BENCHMARK	PS.8.3.A	Describe and explain how climate (temperature and rainfall) primarily determines the characteristics and geographic distribution of biomes, as exemplified by being able to
EXPECTATION	PS.8.3.A. 3.	Explain how biomes do not always follow lines of latitude by identilifying the influences of oceans and mountain ranges on the distribulition of climate and vegetation.
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
STANDARD	ES.14.	How human actions modify the physical environment
STRAND	ES.14.1.	Modification of the Physical Environment: Human modifications of the physical environment in one place often lead to changes in other places
BENCHMARK	ES.14.1. A.	Describe and explain how human-induced changes in one place can affect the physical environment in other places, as exemplified by being able to
EXPECTATION	ES.14.1.A .1.	Describe and explain how the construction of dams and levees on rivers in one region affects places downstream (e.g., water availability for human consumption and agriculture, flood control, electricity generation, aquatic and riparian ecosystems).
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
STANDARD	ES.15.	How physical systems affect human systems
STRAND	ES.15.2.	Environmental Hazards: The types, causes, and characteristics of environmental hazards occur at a variety of scales from local to global
BENCHMARK	ES.15.2. A.	Describe and explain the types and characteristics of hazards, as exemplified by being able to
EXPECTATION	ES.15.2.A .1.	Identify and explain the types of threats posed to human settlement by different types of environmental hazards (e.g., wind destruction, fires, flooding, collapse of structures).
EXPECTATION	ES.15.2.A .2.	Construct a table of climate-related and tectonic-related hazards and explain the characteristics of each type of hazard.
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
STANDARD	ES.15.	How physical systems affect human systems
STRAND	ES.15.2.	Environmental Hazards: The types, causes, and characteristics of environmental hazards occur at a variety of scales from local to global
BENCHMARK	ES.15.2. B.	Explain the causes and locations of various types of environmental hazards, as exemplified by being able to
EXPECTATION	ES.15.2.B .1.	Describe the physical environmental conditions that create or result in different environmental hazards (e.g., plate tectonics causing earthquakes, sea surface temperatures contributing to hurricane development in the Atlantic, strong frontal systems in thunderstorms spawning tornadoes).
EXPECTATION	ES.15.2.B .2.	Identify the tectonic plate boundaries on a map and analyze the most likely locations of future earthquakes and volcanoes based on an explanation for the causes of these environmental hazards.
ESSENTIAL ELEMENT	NGS.ES.	Environment and Society

STRAND	ES.16.2.	Location and Distribution of Resources: The formation and spatial distribution of types of resources
BENCHMARK	ES.16.2. A.	Describe the physical processes that influence the formation and therefore spatial distribution of renewable, nonrenewable, and flow resources, as exemplified by being able to
EXPECTATION	ES.16.2.A	Describe the physical conditions necessary to generate electricity from flow resources (e.g., water, geothermal, solar, wind) and then identify on a US map potential locations for the generation of electricity from these flow resources.

National Geography Standards (NGS) Social Studies

Social Studies Grade 5 - Adopted: 2012		
ESSENTIAL ELEMENT	NGS.WST	The World in Spatial Terms
STANDARD	WST.2.	How to use mental maps to organize information about people, places, and environments in a spatial context
STRAND	WST.2.1	Developing Mental Maps: The locations, characteristics, and patterns of physical and human features are the basis for mental maps at local to global scales
BENCHMARK	WST.2.1 .A.	Identify from memory and describe locations, patterns, and characteristics of physical and human features, as exemplified by being able to
EXPECTATION	WST.2.1. A.3.	Identify from memory and describe the major climate and vegetalition regions of the United States.
ESSENTIAL ELEMENT	NGS.WST	The World in Spatial Terms
STANDARD	WST.2.	How to use mental maps to organize information about people, places, and environments in a spatial context
STRAND	WST.2.3	Using Mental Maps: Mental maps are used to answer geographic questions about locations, characteristics, and patterns of places and regions
BENCHMARK	WST.2.3 .A.	Identify from memory and describe the locations, characteristics, and patterns of places and regions to answer geographic questions, as exemplified by being able to
EXPECTATION	WST.2.3. A.3.	Identify from memory the distribution, pattern, and characteristics of major world deserts and mountain ranges that can be barriers to travel or settlement.
ESSENTIAL ELEMENT	NGS.WST	The World in Spatial Terms
STANDARD	WST.3.	How to analyze the spatial organization of people, places, and environments on Earth's surface
STRAND	WST.3.3	Spatial Models: Models are used to represent spatial processes that shape human and physical systems
BENCHMARK	WST.3.3 .A.	Describe the processes that shape human and physical systems (e.g., diffusion, migration, and plate tectonics) using models, as exemplified by being able to
EXPECTATION	WST.3.3. A.3.	Describe urban models, such as sector or ring models, using a digital globe or map (e.g., Paris as an example of a sector model, Moscow as an example of a ring model).
ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.4.	The physical and human characteristics of places
STRAND	PR.4.2.	The Characteristics of Place: Physical and human characteristics of places change
BENCHMARK	PR.4.2.B	Explain the ways that human processes change places, as exemplified by being able to

EXPECTATION	PR.4.2.B. 1.	Describe and explain how the introduction of a new industry or the closing of an existing industry could change the characteristics of a place.
ESSENTIAL ELEMENT	NGS.PR.	Places and Regions
STANDARD	PR.5.	That people create regions to interpret Earth's complexity
STRAND	PR.5.1.	The Concept of Region: Different types of regions are used to organize and interpret areas of Earth's surface
BENCHMARK	PR.5.1.A	Identify and explain the criteria used to define formal, functional, and perceptual regions, as exemplified by being able to
EXPECTATION	PR.5.1.A. 1.	Identify and explain the bases for the formal region(s), functional region(s), and perceptual region(s) for the community or state where the students live (e.g., for Michigan, the Kalamazoo-Battle Creek Metropolitan Statistical Area is a formal region, the fruit belt in Southwest Michigan is a functional region, Kalamazoo as the snow belt capital of Lake Michigan is a perceptual region).
EXPECTATION	PR.5.1.A. 3.	Analyze collected maps with regional labels as examples of formal, functional, or perceptual regions (e.g., maps of physical regions as formal, weather maps as functional, tourist maps as perceptual).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.1.	Components of Earth's Physical Systems: The four components of Earth's physical systems (the atmosphere, biosphere, hydrosphere, and lithosphere) are interdependent
BENCHMARK	PS.7.1.A	Identify and describe patterns in the environment that result from the interaction of Earth's physical processes, as exemplified by being able to
EXPECTATION	PS.7.1.A. 2.	Identify and describe the patterns that result from the connections between climate and vegetation (e.g., examples of patterns of ecosys@tems and biomes).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.1.	Components of Earth's Physical Systems: The four components of Earth's physical systems (the atmosphere, biosphere, hydrosphere, and lithosphere) are interdependent
BENCHMARK	PS.7.1.B	Analyze and explain patterns of physical features resulting from the interactions of Earth's physical processes, as exemplified by being able to
EXPECTATION	PS.7.1.B. 1.	Analyze maps of tectonic plates to predict the location of physical features (e.g., mountain ranges, volcanoes, rift valleys).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.2.	Earth-Sun Relationships: Earth-Sun relationships drives physical processes that follow an annual cycle and create patterns on Earth
BENCHMARK	PS.7.2.A	Explain how Earth-Sun relationships drive Earth's physical processes and create annual patterns, as exemplified by being able to
EXPECTATION	PS.7.2.A. 1.	Explain the occurrences of weather phenomena in different localitions due to annual changes in the Earth-Sun relationship (e.g., hurliricanes in the fall in subtropical areas, monsoon rainfall, tornadoes in the mid-latitudes during the spring and summer)

the spring and summer).

ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.7.	The physical processes that shape the patterns of Earth's surface
STRAND	PS.7.3.	Physical Processes: Physical processes generate patterns of features across Earth's surface
BENCHMARK	PS.7.3.A	Analyze and explain the patterns that occur on Earth's surface as a result of physical processes, as exemplified by being able to
EXPECTATION	PS.7.3.A. 2.	Explain how physical processes related to plate tectonics form is lands (e.g., Hawaiian Islands) or increase the elevation of mountains (e.g., Himalayan Mountains).
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.2.	Characteristics and Geographic Distribution of Ecosystems: Physical processes determine the characteristics of ecosystems
BENCHMARK	PS.8.2.A	Describe and explain how physical processes determine the characteristics of ecosystems, as exemplified by being able to
EXPECTATION	PS.8.2.A. 2.	Explain how different locations can have similar ecosystems as a function of temperature, precipitation, elevation, and latitude by usling climographs and vegetation maps.
ESSENTIAL ELEMENT	NGS.PS.	Physical Systems
STANDARD	PS.8.	The characteristics and spatial distribution of ecosystems and biomes on Earth's surface
STRAND	PS.8.3.	Characteristics and Geographic Distribution of Biomes: Climate primarily determines the characteristics and geographic distribution of biomes
BENCHMARK	PS.8.3.A	Describe and explain how climate (temperature and rainfall) primarily determines the characteristics and geographic distribution of biomes, as exemplified by being able to
EXPECTATION	PS.8.3.A. 3.	Explain how biomes do not always follow lines of latitude by identi@fying the influences of oceans and mountain ranges on the distribu@tion of climate and vegetation.
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.9.	The characteristics, distribution, and migration of human populations on Earth's surface
STRAND	HS.9.2.	Spatial Distribution of Population: The distribution and density of population varies over space and time
BENCHMARK	HS.9.2.B	Analyze and explain the variations of population distribution on national and global scales, as exemplified by being able to
EXPECTATION	HS.9.2.B. 1.	Describe and analyze the current distribution of population in the United States (e.g., comparing the East and West Coasts, pattern of population east versus west of the 100th meridian).
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.10.	The characteristics, distribution, and complexity of Earth's cultural mosaics
STRAND	HS.10.2.	Patterns of Culture: Multiple cultural landscapes exist and vary across space
BENCHMARK	HS.10.2. B.	Compare different cultural landscapes, as exemplified by being able to

EXPECTATION	HS.10.2.B .2.	Compare the cultural landscapes of urban and suburban residential areas in terms of the amount of space, population density, and horiizontal versus vertical use of space.
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.11.	The patterns and networks of economic interdependence on Earth's surface
STRAND	HS.11.1.	Economic Activities: The functions of different types of economic activities
BENCHMARK	HS.11.1. A.	Describe and analyze the functions of economic activities in the primary, secondary, tertiary, and quaternary sectors, as exemplified by being able to
EXPECTATION	HS.11.1.A .1.	Analyze a list of economic activities and identify them as primary (e.g., forestry, copper mining, and growing coffee), secondary (e.g., producing furniture, copper wire, and grinding coffee beans), tertiary (e.g., furniture sales, selling copper wire, and selling latte) or quater@nary (e.g., advertising and marketing research) activities.
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.11.	The patterns and networks of economic interdependence on Earth's surface
STRAND	HS.11.2.	Location and Spatial Patterns of Economic Activities: Access to factors of production, such as capital, labor, raw materials, and energy, influence the location of economic activities
BENCHMARK	HS.11.2. A.	Compare and explain the advantages of one location over another in the access to factors of production, as exemplified by being able to
EXPECTATION	HS.11.2.A .1.	Explain why certain locations have developed a reputation for prollducing specific goods or services (e.g., Wyoming is known for its coal and natural gas deposits, China is known for assembly and manufacturing labor, New York is known as a center for investment capital).
EXPECTATION	HS.11.2.A .2.	Construct and analyze maps of the relationships between the differdent resources in various manufacturing industries (e.g., automobiles with the sources for glass, tires, sheet metal, and assembly locations; computers with the sources for circuit boards, software, electrical components, wireless chips, and assembly locations).
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.12.	The processes, patterns, and functions of human settlement
STRAND	HS.12.1.	Functions of Settlements: Different types of functions can influence the success or failure of settlements
BENCHMARK	HS.12.1. A.	Describe the typical functions of settlements and explain how they might influence the success or failure of a settlement, as exemplified by being able to
EXPECTATION	HS.12.1.A .1.	Describe and explain the reasons people may choose to settle in citties (e.g., diverse employment opportunities, educational and cultural opportunities, sports and entertainment venues, health and social services, public transportation alternatives, retail shopping centers).
EXPECTATION	HS.12.1.A .2.	Describe and explain the reasons why people may choose to move away from cities (e.g., high crime rates, congested traffic, lack of adlequate health and social services, inadequate education facilities).
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.12.	The processes, patterns, and functions of human settlement
STRAND	HS.12.2.	Functions of Settlements: A combination of a favorable location and human activities lead to the growth of settlements
BENCHMARK	HS.12.2. A.	Explain the human activities in favorable locations that attracted people and resulted in the development of settlements, as exemptified by being able to

EXPECTATION	HS.12.2.A .1.	Describe and explain the human activities (e.g., trade, political ad@ministration, transportation, exploiting resources) that led to the development of cities (e.g., Shanghai is a major world port and com@mercial city, Pittsburgh was a transportation and iron and steel cen@ter near large deposits of coal, Singapore is located along one of the world's major ocean transportation corridors).
EXPECTATION	HS.12.2.A .2.	Analyze the growth of three major world cities and explain reasons why their locations may have been favorable for human activities relisulting in the development of these places.
EXPECTATION	HS.12.2.A .3.	Describe and explain how recent human activities contributed to the development of cities in different locations (e.g., development of electrical energy capacity and air conditioning in southern US cities, irrigation to increase the number of golf courses in resort towns, tax incentives or policies encouraging new business development).
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
STANDARD	HS.12.	The processes, patterns, and functions of human settlement
STRAND	HS.12.3.	Patterns of Settlements: There are patterns of settlements in regions
BENCHMARK	HS.12.3. A.	Compare and explain the location, number, and sizes of settlements in regions, as exemplified by being able to
EXPECTATION	HS.12.3.A .1.	Analyze maps and satellite images and compare different types of settlement patterns observed across regions (e.g., linear rural settlellment along roadways, railways, and rivers; urban centers that spread from a central node; village clusters or rural landscapes; seaport settlements that are interrupted by water, such as a water body or a large river).
EXPECTATION	HS.12.3.A .2.	Explain possible reasons why some locations can support more population in settlements than other locations.
EXPECTATION	HS.12.3.A .3.	Compare the settlement patterns in three different regions of the world and describe the particular patterns (e.g., linear patterns, clus@tered patterns, dispersed patterns).
ESSENTIAL ELEMENT	NGS.HS.	Human Systems
	NGS.HS.	The processes, patterns, and functions of human settlement
ELEMENT		The processes, patterns, and functions of human settlement

Describe the physical environmental conditions that create or result in different environmental hazards (e.g., plate tectonics causing earthquakes, sea surface temperatures contributing to hurricane development in the Atlantic, strong frontal systems in thunderstorms spawning tornadoes).
EXPECTATION	ES.15.2.B .2.	Identify the tectonic plate boundaries on a map and analyze the most likely locations of future earthquakes and volcanoes based on an explanation for the causes of these environmental hazards.

ESSENTIAL ELEMENT	NGS.ES.	Environment and Society
STANDARD	ES.16.	The changes that occur in the meaning, use, distribution, and importance of resources
STRAND	ES.16.1.	Types and Meanings of Resources: People can have different viewpoints regarding the meaning and use of resources
BENCHMARK	ES.16.1. A.	Describe examples of how cultures differ in their definition and use of resources, as exemplified by being able to

EXPECTATION ES.16.1.A Describe differences in the types of resources used in different geographic contexts in various parts of the world .1. (e.g., the use of wood or animal dung versus electricity or natural gas as a cooking fuel, the use of electrical appliances versus doing household chores by hand).

ESSENTIAL ELEMENT	NGS.UG.	The Uses of Geography
STANDARD	UG.17.	How to apply geography to interpret the past
STRAND	UG.17.2	Changes in Geographic Contexts: Change occurs in the geographic characteristics and spatial organization of places, regions, and environments
BENCHMARK	UG.17.2. A.	Describe and explain changes in the geographic characteristics and spatial organizations of places, regions, and environments in the past, as exemplified by being able to
EXPECTATION	UG.17.2.A	Describe the changes in the spatial organization of cities over the past 100 years (e.g., the effects of

EXPECTATION UG.17.2.A Describe the changes in the spatial organization of cities over the past 100 years (e.g., the effects of suburbanization, freeway systems, public transit, skyscrapers, shopping malls).

Next Generation Science Standards (NGSS) Science

Grade 5 - Adopted: 2013

STRAND	NGSS.5- ESS	EARTH AND SPACE SCIENCE
TITLE	5-ESS2	Earth's Systems
		Students who demonstrate understanding can:

PERFORMANCE 5-ESS2-1 Develop a model using an example to describe ways the geosphere, biosphere, hydrosphere, and/or atmosphere EXPECTATION interact.
